

Professional Summary

Data Science & Analytics graduate focused on turning complex data into clear insights, reliable predictions, and practical decisions. Experience spans predictive modeling, time-series forecasting, data analysis, and technical problem solving, with a track record of applying data to real-world business and operational challenges.

Experience

Research Assistant - Data Analytics & Forecasting

January 2026 – May 2026

University of Oklahoma

Norman, Oklahoma

- Built an end-to-end forecasting pipeline using 20+ years of epidemiological data to predict acute respiratory infection incidence across high-burden regions in Peru, supporting proactive public health monitoring.
- Developed forecasting models across three high-burden regions, achieving up to 94% explanatory accuracy (R^2) and improving anticipation of seasonal disease patterns.
- Compared forecasting approaches and generated regional and national projections, identifying reliable models to support disease surveillance and healthcare resource planning.

IT Services Specialist

August 2024 – May 2026

University of Oklahoma

Norman, Oklahoma

- Diagnosed and resolved 70–80% of Tier 1 technical incidents, isolating root causes and determining appropriate solutions or escalation paths across hardware, software, account, and access issues.
- Analyzed high-volume service requests to identify recurring issues, usage patterns, and trends, helping prioritize troubleshooting and identify areas for process improvement.
- Documented troubleshooting patterns and service trends to improve resolution consistency, while triaging requests by urgency and impact and coordinating with users and technical teams.

Data Scientist

January 2024 – June 2024

GoPunch

Hyderabad, India

- Analyzed customer and marketing data to identify high-value segments and campaign patterns, improving targeting precision by 15%.
- Built predictive models and designed A/B tests to evaluate customer behavior and campaign effectiveness, translating results into actionable marketing strategies. Developed performance dashboards to track campaign metrics and support data-driven decision-making.

Projects

IRA Forecasting & Public Health Surveillance using Time Series Modeling

- Built statistical, machine learning, and deep learning forecasting models on 20+ years of epidemiological data using multiple prediction models. Performed large-scale temporal, seasonal, and regional analysis with lag features, rolling statistics, and seasonal encodings to identify outbreak patterns. Implemented validation-driven forecasting pipelines with rolling-window evaluation and recursive multi-step prediction.

Energy Consumption Forecasting and Optimization in Steel Manufacturing using Data Mining Approaches

- Developed regression, clustering, and anomaly detection models to forecast industrial energy consumption and identify operational patterns in manufacturing data. Generated predictive insights from large-scale industrial datasets to support energy optimization and sustainability initiatives.

Motor Vehicle Collision Severity Prediction

- Built classification models using traffic, roadway, and environmental data to predict accident severity and identify major risk factors. Performed preprocessing, feature engineering, and model evaluation to improve prediction performance and support road safety analysis.

Technical Skills/Interests

Programming & Databases: Python, R, JavaScript, HTML/CSS, SQL, PostgreSQL, MySQL, SQLite

Data Science and Machine Learning: Scikit-learn, Pandas, NumPy, Matplotlib, Seaborn, Jupyter Notebooks, Supervised & Unsupervised Learning, Feature Engineering, Model Evaluation & Tuning, NLP

Libraries & Tools: Pandas, NumPy, Scikit-learn, Matplotlib, Seaborn, Excel, Git/GitHub

Data Visualization: Tableau, PowerBI, Excel, Matplotlib, Plotly

Tools: Git, Jupyter, Jira, Linux, VS Code

Education

University of Oklahoma

August 2024 – May 2026

Master's of Science in Data Science & Analytics (CGPA: 4.0)

Norman, Oklahoma

CVR College of Engineering

December 2020 – April 2024

Bachelor's of Technology in Computer Science & Engineering

Hyderabad, India
